

## TELL YOUR EMPLOYEES ABOUT BLUECARE ON YOUR COMPANY'S INTRANET

If you'd like to remind your employees about seeing a doctor online, you can now place a BlueCare graphic on your intranet website.

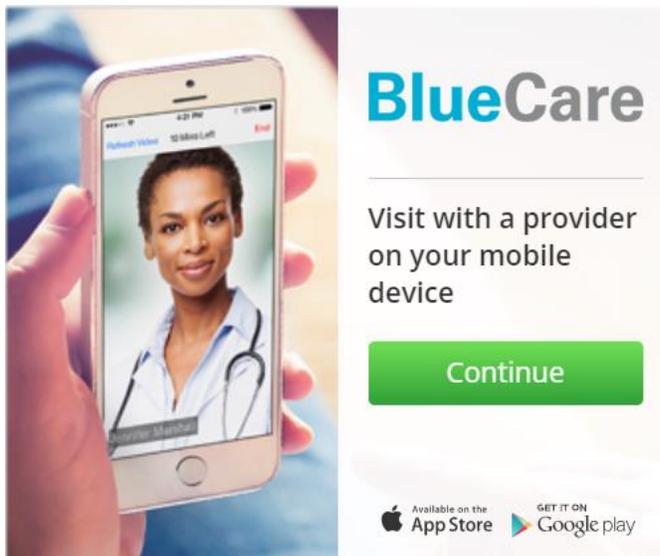

The graphic includes a link to the BlueCare website and links to the BlueCare mobile apps for iOS and Android devices.

Here's how to place the BlueCare graphic on your site:

Ask the person who manages your intranet site to add the following to your site:

```
<iframe src="https://amwell.com/cm/widgets/platform/0/bcla?theme=light" height="280" width="336" style="border-width:0px;"></iframe>
```

This code should produce an image that looks like this:

The green Continue button links to the BlueCare website. And you can find links to the BlueCare mobile apps at the bottom of the graphic.

So give your employees easy access to BlueCare from your intranet site today!
